

Here at ECSESS (Electrical, Computer, and Software Engineering Student Society), we have a variety of events that we host to all students that range from academic to social activities. Some have been around for years and some are new. Here are a few to name...

### Code.Jam() @ McGill

A yearly event we host – sign up individually or in teams for a real life programming challenge. Fueled by pizza and energy drinks, Code.Jam() is a 48-hour programming competition where the problem is formulated by employees from companies that sponsor this event and even do some recruiting while they are here! There are cash and raffle prizes to be won.

### ECSESS Coffeehouse

Started only a couple of years ago, coffeehouse has become known and loved as the chill jam session and open mic session open to engineers of all departments. Enjoy some hot chocolate and treats and come see your fellow peers perform their hearts out!

### Professor Speaker Series

Did you know that professors have passion other than their research? This event is where your ECSE professors will share their thoughts on their education, research, and any other life experiences. It's a great way to get to know your professors outside of the classroom environment.

### Ottawa Tech Tour

ECSESS offers you the opportunity to visit some awesome companies from Ottawa's high tech industry. Companies in the past years include Shopify, Cisco, Ciena, Alcatel Lucent and more! Usually held in February, come join us and make connections and friends along the way!

### Fall and Winter End of Semester Banquet

At the end of each semester, we host a banquet with dinner and dancing. Get dressed up, eat some delicious food, and socialize with your fellow classmates and professors to celebrate the completion of yet another semester.
